Slow-age

unretouched pictures

Our skin undergoes attacks from a variety of sources, such as pollution, stress, smoking, alcohol, ...

Your metabolism is affected, cell renewal slows and signs of skin ageing are accentuated.

What if we helped our skin to regenerate naturally to reduce the signs of ageing?

2B BIO PEELING: THE SYNERGY OF 7 PLANT AND MINERAL EXTRACTS

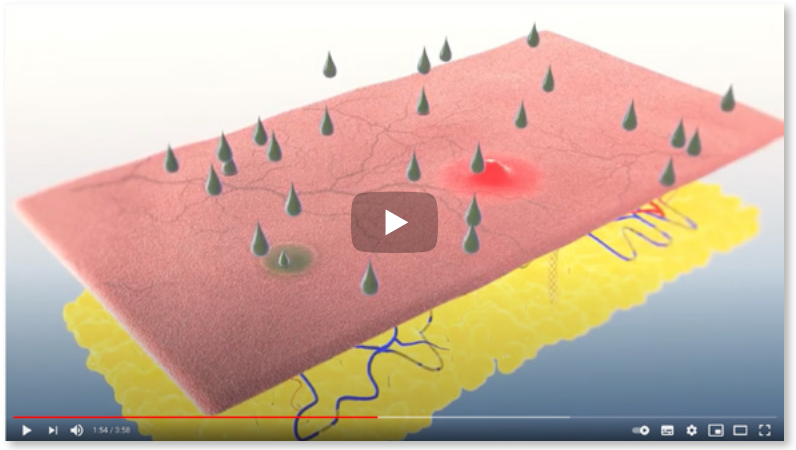

2B Bio Peeling is a product used in manual micro-dermabrasion, a method of skin abrasion that accelerates the removal of dead cells accumulated on the surface of the epidermis.

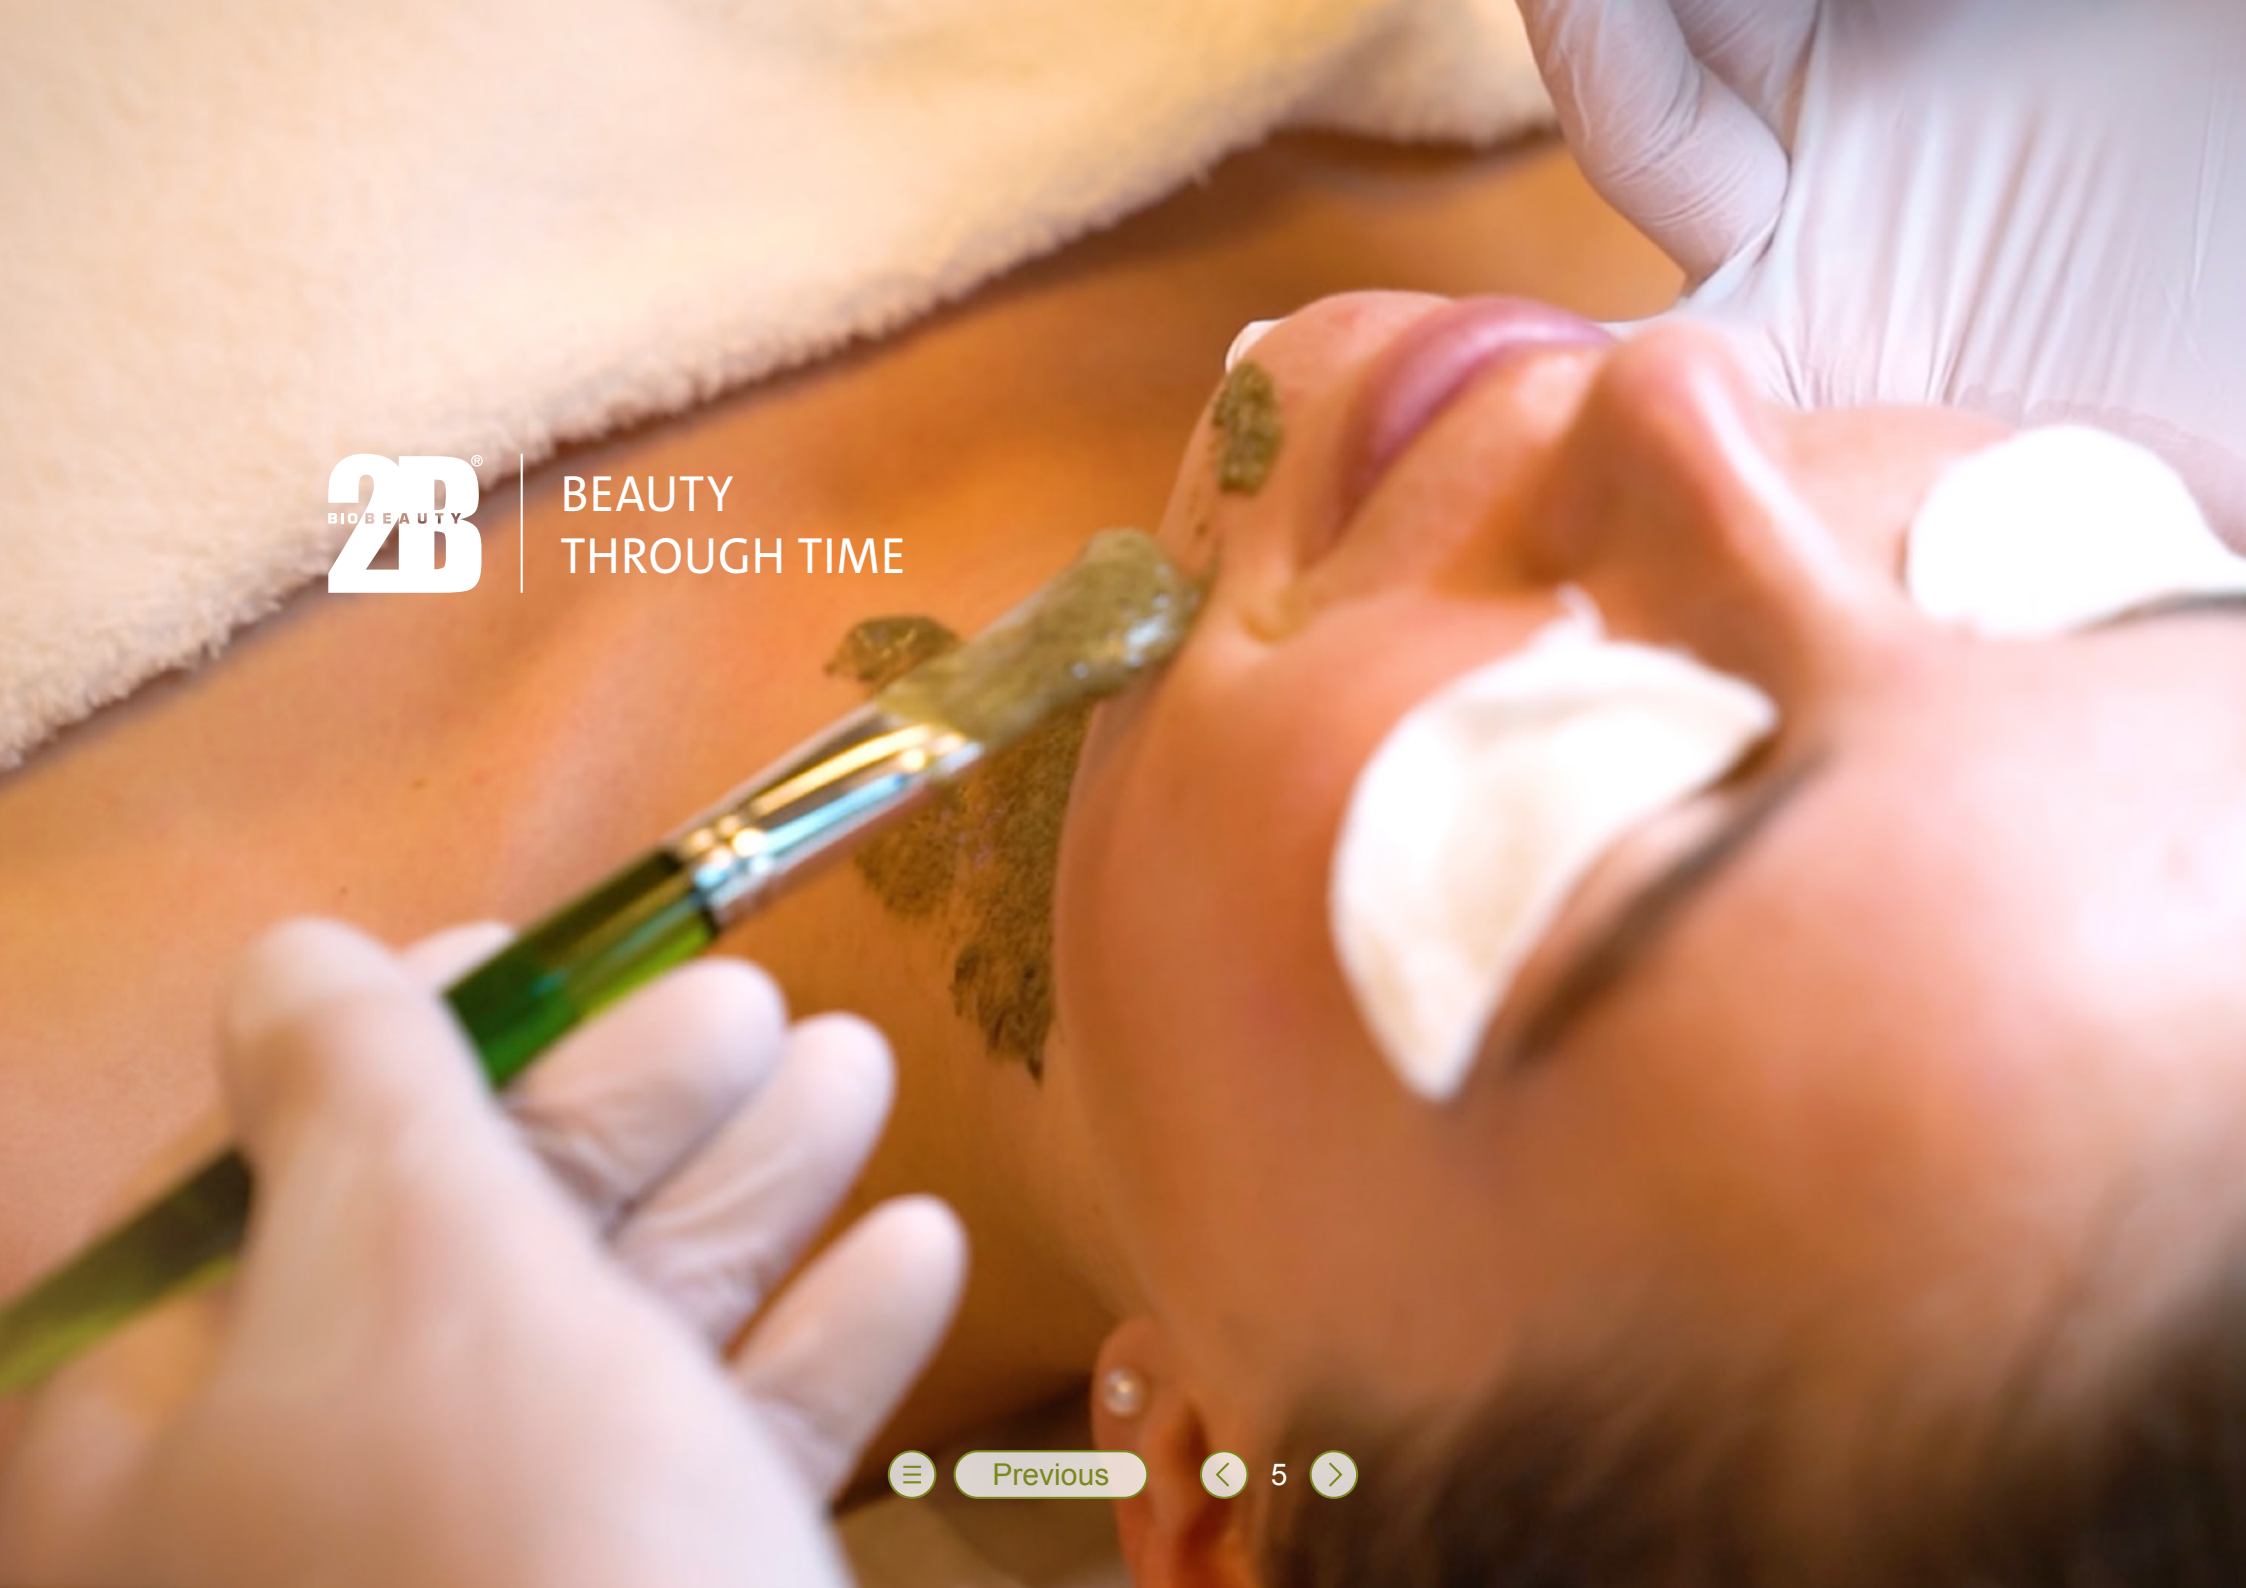

Unlike other treatments that only work on the skin's surface, 2B Bio Peeling is a cell renewal process triggered from within the dermis.

Its main ingredient, freshwater sponge (badiaga spongilla fluviatilis), is carefully selected for its finesse and purity. These calibrated silica micro-needles penetrate the skin, stimulating cell mitosis and accelerating the skin renewal process.

Wrinkles fade, skin is lifted, redness and dark circles are reduced. Pores are reduced, cleansed and smoothed, leaving skin clear and even.

2B BIO PEELING
CARES AND CURES

Face

Slow-age care
Intensely oxygenated and moisturised, the skin can breathe and regain its youthful radiance. It will be softer, stronger and firmer. Wrinkles and fine lines are reduced.

Purifying care
Helps eliminate blackheads and pimples and regulates excess sebum. The skin is deeply purified. Dilated pores are tightened and skin texture is refined.

Lightening care
Melanin production is slowed down. Pigmentation spots are reduced. Your complexion will be clearer, brighter and more even.

Body

Purifying, toning care
Deeply purified, your skin will regain its vitality, firmness and natural softness. Blood circulation will be improved and toxins are eliminated.

2B Bio Peeling cures

This effective and innovative approach slows down your skin's ageing process. It offers a natural alternative and makes it possible to delay the use of more invasive methods. Allowing you to enjoy a healthy, radiant, younger-looking appearance.

Advantages of slow-age cures
- Cure of 4 cares spaced 7 to 10 days apart.
- Regular care for significant, long-lasting results.
- Skin assessment and personalised adjustments at each appointment.
- A combination of salon cares and home products.
- Low cost.

HOW A 2B BIO PEELING TREATMENT WORKS

1. Cleaning

We start by preparing your skin by carefully removing make-up, deep cleansing and gently exfoliating. These preliminary steps prepare her to receive all the benefits of the treatment.

2. 2B Bio Peeling

The 2B Bio Peeling mixture of powder and solution, specially adapted to your skin, is applied to your face and neck. After a gentle massage, you'll feel a slight sensation of warmth and tingling, signs that the active ingredients are working deep down to regenerate your skin.

3. Soothing, nourishing

After rinsing with fresh water, we soothe any tension with a suitable lotion. A cream mask is then applied to nourish your skin.

4. Oxygenating, moisturising, lightening

We continue the treatment with a cream or serum specially chosen to suit the characteristics of your skin.

5. Protecting

Finally, to protect your skin from ultraviolet rays, 2B Bio Défense (natural or tinted) provides optimum sun protection.

SKINCARE ROUTINES

Face

Beauty routine
Personalised care tailored to your skin type, with particular attention paid to preventing skin problems, for visible, long-lasting results.

Enzymatic care
Thanks to the innovative active ingredients in 2B Bio Enzyscrub, the skin is gently exfoliated. The skin is purified, nourished and protected from the harmful effects of pollution.

Toning and antioxidant peel-off treatment
A true vitamin C bath for the skin! This treatment brightens and revitalizes the epidermis. Ideal for revitalizing tired complexions and preventing the first signs of aging.

Remineralizing and soothing care
Helps strengthen the skin barrier, rebalance moisture levels and soothe feelings of discomfort. Reduces signs of irritation, redness or skin sensitivity.

Body

Enzymatic care
Dead skin cells and impurities are gently removed. The skin regenerates and collagen production is stimulated. Nourished and deeply moisturised, your skin's texture will improve.

FAQS

Q What makes the 2B Bio Beauty® brand so different?

A The main target of the 2B Bio Beauty® slow-age cures consists in reducing the time amplitude of cells renewal and thus to decrease the aging signs.

Q To whom is the concept of 2B Bio Beauty® cures for?

A From Red carpet treatment to remedy for specific disgraces, 2B Bio Beauty® skin-care treatments meets every man and woman expectations from puberty

Q What is 2B Bio Peeling?

A 2B Bio Peeling is a product used in manual micro-dermabrasion (no device needed). The skin abrasion method aims to eliminate the dead cells (corneocytes) of its stratum corneum. Unlike other peeling cares that only work on the surface, 2B Bio Peeling triggers the exfoliation process from within.

Q What kind of result can I expect from this?

A The skin is purified in depth, the cellular metabolism is reactivated, the wrinkles and fine lines are bolstered from within. Dilated pores are tightened, and pigmentation reduced. A brilliant result which illuminates your face immediately.

Q How often should I have this care done?

A Results are already visible from the first session. However, for better performance, a cure of 4 cares spaced at least 7 days apart is recommended. Depending on the case, additional cares may be recommended for optimal results.

Q What is the downside?

A A prickling feeling will appear during and after the care for 1 to 2 days.

Q Are there any specific recommendations following the peeling session?

A Regularly use a protecting cream (2B Bio Defense BB Cream or Natural). Avoid sun exposures and sauna baths during the first days after the care.

Q My skin is very sensitive. Is it safe?

A Micro-dermabrasion can be used on all skin types and tones.

Q Can I have the care during pregnancy or while breastfeeding?

A The care is not recommended during pregnancy or breastfeeding. It is advisable to wait for 5 months after breastfeeding.

Q Which products may I use after the care?

A 2B Bio Beauty® care products have been especially created to calm down the potential skin reactions (prickling and red blotches) and magnify the peeling result.

Q Where are the products manufactured?

A All formulas are created and manufactured in Libinvest Cosmetics head offices in Binche. The production meets the ISO22716 regulation. The products are certified at national, European, and international level (USA, Japan, Korea, Malaysia ...).
